

1. **Introduction**
The purpose of this study is to investigate the effects of the proposed system on the performance of the system.

2. **Methodology**
The study was conducted using a combination of qualitative and quantitative methods.

3. **Results**
The results of the study indicate that the proposed system has a significant positive impact on the system's performance.

4. **Conclusion**
The study concludes that the proposed system is effective in improving the system's performance.
