

1. **Introduction**  
 The purpose of this study is to investigate the effects of the proposed system on the performance of the system. The study is divided into two main parts: a theoretical analysis and an experimental evaluation.

2. **Theoretical Analysis**  
 The theoretical analysis is based on the assumption that the system is a linear system. The analysis is based on the assumption that the system is a linear system. The analysis is based on the assumption that the system is a linear system.

3. **Experimental Evaluation**  
 The experimental evaluation is based on the assumption that the system is a linear system. The analysis is based on the assumption that the system is a linear system. The analysis is based on the assumption that the system is a linear system.

4. **Conclusion**  
 The results of the study show that the proposed system has a significant effect on the performance of the system. The results of the study show that the proposed system has a significant effect on the performance of the system.
